Salamander Designs Launches New Models for Flagship Chameleon Collection of A/V Cabinets

New Configurations in Geneva, Sonoma, Berlin and Hampton Styles Add Choices and Versatility for Customers and Installers

BLOOMFIELD, CT, May 12, 2008 — Salamander Designs, Ltd., a leading designer and manufacturer of modern furniture, seating and mounting products for Home Theater and A/V entertainment systems, has announced three new Models in each of four basic styles for its flagship **Chameleon Collection** of audio/video entertainment cabinets.

The new Models, expressed in Chameleon's four cabinet styles — **Geneva, Sonoma, Berlin and Hampton** — offer customers and Custom installers a full **dozen new choices** in cabinetry design. As a result, **Models 323, 336 and 337** significantly broaden the modular Chameleon Collection's versatility, functionality and flexibility, especially for consumers who prefer to conceal their audio or video components.

Geneva, Model 336

Model 323 is a wide "twin" cabinet with two 30-inch high doors. Model 336 features two 30-inch high doors flanking a 20-inch high center door below a shelf equipped with a speaker grill. Model 337 is a wide "triple" cabinet with three 30-inch high doors. The new 30-inch high doors introduce the option of fully enclosing Chameleon's 30-inch high cabinets. Previously, Chameleon cabinets have only been available with 20-inch high doors, and a shelf to occupy the remaining height.

Sonoma, Model 323

In addition to the new Models, Salamander Designs is also offering new options for Chameleon Collection cabinets, including Extended Rear Panels to better accommodate oversize components, and an Extended Rear Panel with an Active Cooling Kit. The Extended Rear Panels provide more depth and ventilation than standard rear panels, are easily removed for quick component access, and are constructed of heavy-weight powder-coated steel.

The Extended Rear Panel with Active Cooling Kit prevents heat build-up inside the cabinet. It employs a remote thermostat and dual, maintenance-free fans for precision cooling. The rear panels are easily removed for quick component access, and constructed of heavy-weight black powder-coated steel with ventilation louvers.

The Chameleon Collection's handsome cabinet styles continue to offer numerous standard features, including solid-wood doors, soft-close dampeners, built-in ventilation louvers, infinitely adjustable shelves, and removable rear panels for easy access to component jacks. All employ an extruded aluminum framework, hidden from view and ingeniously

designed to support and conceal a series of high-tech accessories that add to their versatility and ease of use. Current accessories include a multiple-outlet power conditioner, and an IR Repeater System that allows any handheld remote to control A/V components installed behind the Chameleon's solid doors.

Like other Salamander Designs products, the Chameleon Collection is

constructed of premium components with exceptional attention to detail, reliability and durability. The new Models further demonstrate how Salamander Designs' commitment to innovation benefits dealers and customers alike, and help both dealers and custom installers conduct more business with their established vendors.

About Salamander Designs

Salamander Designs, Ltd. is a leading developer, manufacturer and marketer of modern furniture, storage, seating and mounting systems for contemporary Home Theater and A/V entertainment systems. Its versatile, advanced products bridge the gap between home furnishings and home electronics with an unstinting dedication to quality, and a broad range of solutions employing the simple, refined lines of modern design. Salamander's A/V furniture lines

— the [Chameleon Collection](#), the [Synergy System](#) and the [Archetype System](#) —accommodate virtually any design preference and A/V requirement. Its handsome Home Theater seating can be similarly customized with a variety of materials, styling options and accessories, and its new mounting systems for plasma and other flat-panel displays make them easier than ever to integrate with A/V furniture or independently mount onto a wall or ceiling. Salamander Designs was founded in 1992 in Hartford, Connecticut, and is now based in Bloomfield. For further technical information, visit Salamander's Web site at www.salamanderdesigns.com.

Hampton, Model 337
