Salamander Designs Introduces Madrid — A Sleek, Feature-Rich Home Entertainment Cabinet

**Sophisticated New Triple-Wide A/V-System Solution
Boasts Space, Simplicity, Storage and Style**

BLOOMFIELD, CT, Oct. 23, 2008 — Salamander Designs, Ltd., a leading designer and manufacturer of modern furniture, seating and mounting products for Home Theater and A/V entertainment systems, introduces the Madrid audio/video entertainment cabinet, a stylish, high-quality furniture solution, packed with practical features, that meets the needs of high-end electronic components and exceeds the expectations of entertainment consumers.

The Madrid is a sleek, fully assembled triple-wide cabinet whose clean, minimalist lines recall the strong modern design influences so compelling in mid-twentieth century furnishings. Its contemporary design will appeal to customers looking for a simple, sophisticated solution to their A/V needs that also complements their décor.

Designed, engineered and manufactured by a company on the forefront of the industry, the Madrid is unique in the depth and breadth of its features. For example, it provides ample storage for TVs plus up to five other components (including a center-channel speaker), a pull-out drawer for DVDs and CDs, easy accessibility, good ventilation, adjustable shelves, raceways for concealing and managing wires, and easy compatibility with IR remotes. The understated wood base conceals non-marking casters that make Madrid easy to install, move, service and clean.

The Madrid is also a model of quality construction. Measuring 70 inches wide by 22 inches high by 20.25 inches deep, the cabinet presents three compartments accessible using sliding bypass doors with warm, bronze-tinted glass panels that permit IR signals to pass through to the A/V components inside. Each unit comes with a classic Natural Cherry veneer, or a more Euro-contemporary Espresso finish on open-grain Oak veneer. The adjustable shelves each support 50 lbs. and the wood top supports up to 250 lbs., making it a practical choice for virtually all components. Sliding rear panels provide easy access to components from the back.

The Madrid is available now in Natural Cherry from Salamander Designs dealers at a suggested price of \$1,499. It will be available in Wenge later this year.

About Salamander Designs

Salamander Designs, Ltd. is a leading designer, manufacturer and marketer of modern furniture, storage, seating and mounting systems for contemporary Home Theater and A/V entertainment systems. Its versatile, advanced products bridge the gap between home furnishings and home electronics with an unstinting dedication to quality, and a broad range of solutions employing the simple, refined lines of modern design. Salamander's A/V furniture lines — the **Chameleon Collection**, the **Synergy System** and the **Archetype System** — accommodate virtually any design preference and A/V requirement. Its handsome Home Theater seating can be similarly customized with a variety of materials, styling options and accessories, and its new mounting systems for plasma and other flat-panel displays make them easier than ever to integrate with A/V furniture or independently mount onto a wall or ceiling. Salamander Designs was founded in 1992 in Hartford, Connecticut, and is now based in Bloomfield. For further technical information, visit Salamander's Web site at www.salamanderdesigns.com
